

Leveraging these value streams ...

enables the realisation
of our strategy ...

Timber

- Our Forest Stewardship Council™ (FSC™ N003159) and Programme for the Endorsement of Forest Certification (PEFC/01-44-43) certified tree plantations in South Africa provide a high-quality woodfibre base and enhance our competitive advantage. Our leading-edge tree improvement programmes ensure this advantage is maintained and leveraged.

Manufacturing excellence

- We focus on enhancing machine efficiencies, digitising our processes to make the smart factory a reality, reducing variable costs through new logistics and procurement practices and implementing go-to-market strategies which lower the cost of serving our customers and increase customer satisfaction.

Biomaterials

- We are unlocking the chemistry of trees and aligning with the circular economy by establishing a strong position in adjacent businesses, including nanocellulose, furfural, lignosulphonates and bioenergy. Extracting more value from each tree is at the core of our business model.

Pulp

- Our dissolving pulp (DP) brand, Verve, creates renewable alternatives for raw material feedstock to textiles, pharmaceuticals, foodstuffs and more – products that meet the needs of people around the globe every day.

Speciality papers

- Our customers use our speciality papers to add value to niche markets and enable product differentiation. Our focus on innovation helps our customers to meet and anticipate the challenges of changing market dynamics.

Packaging papers

- Our packaging solutions offer environmentally conscious consumers an alternative to fossil-fuel-based packaging.

Graphic papers

- Our market-leading range of coated and uncoated graphic paper products is used in magazines, corporate reports and accounts, direct mail, high-quality brochures, catalogues, calendars and books.
