Maximum +/- 50%

1. The minimum premium which qualifies for scheduled rating is \$500 estimated annual modified manual premium (modified manual premium = manual premium after the application of experience modification).
2. The schedule rating factor is applied in a multiplicative manner after the application of the experience rating modification (if the risk is experience rated) and before the application of the premium discount.
3. The credit or debit must be within the range for a specific risk characteristic as provided in this plan.
4. The effective date of the schedule rating factor must be on or after the date of the carrier's receipt of the documentation supporting the basis for the schedule rating factor.
5. At the time that the schedule rating factor is applied, the carrier must have documentation on file detailing the basis for the credit or debit.
