OTHER RECOMMENDED AI TOOLS LIST

1. CLAUDE 2

URL: <https://claude.ai>

DESCRIPTION: Claude 2, an advanced AI model, boasts improved performance with longer responses and API accessibility. Claude 2 is a direct ChatGPT alternative. It excels in various domains, including education, coding, and natural language interaction. For example, it performs exceptionally well on the Bar exam, scoring 76.5%, and excels in coding tasks, with a 71.2% score on the Codex HumanEval Python coding test. Claude 2 supports up to 100K tokens, making it suitable for handling lengthy technical documents and books. It has undergone rigorous safety improvements, rendering it 2x better at providing harmless responses compared to Claude 1.3. Falling into the category of Natural Language Processing (NLP) and AI Assistant tools, Claude 2 can assist with content generation, coding tasks, educational support, content remixing, providing contextual answers, and enhancing customer service, making it a versatile tool for numerous applications. Claude 2 allows you to interact with various documents you have allowing you to ask questions, organize data, and much more similar to the ChatGPT Data Analysis feature. This is 100% Free AI Chat Tool but they do however offer paid options for upgraded usage limits.

2. BARD / GEMINI (Google Gemini)

URL: <https://gemini.google.com/advanced>
